

Issuing Vehicle Authorisations: information for the applicants

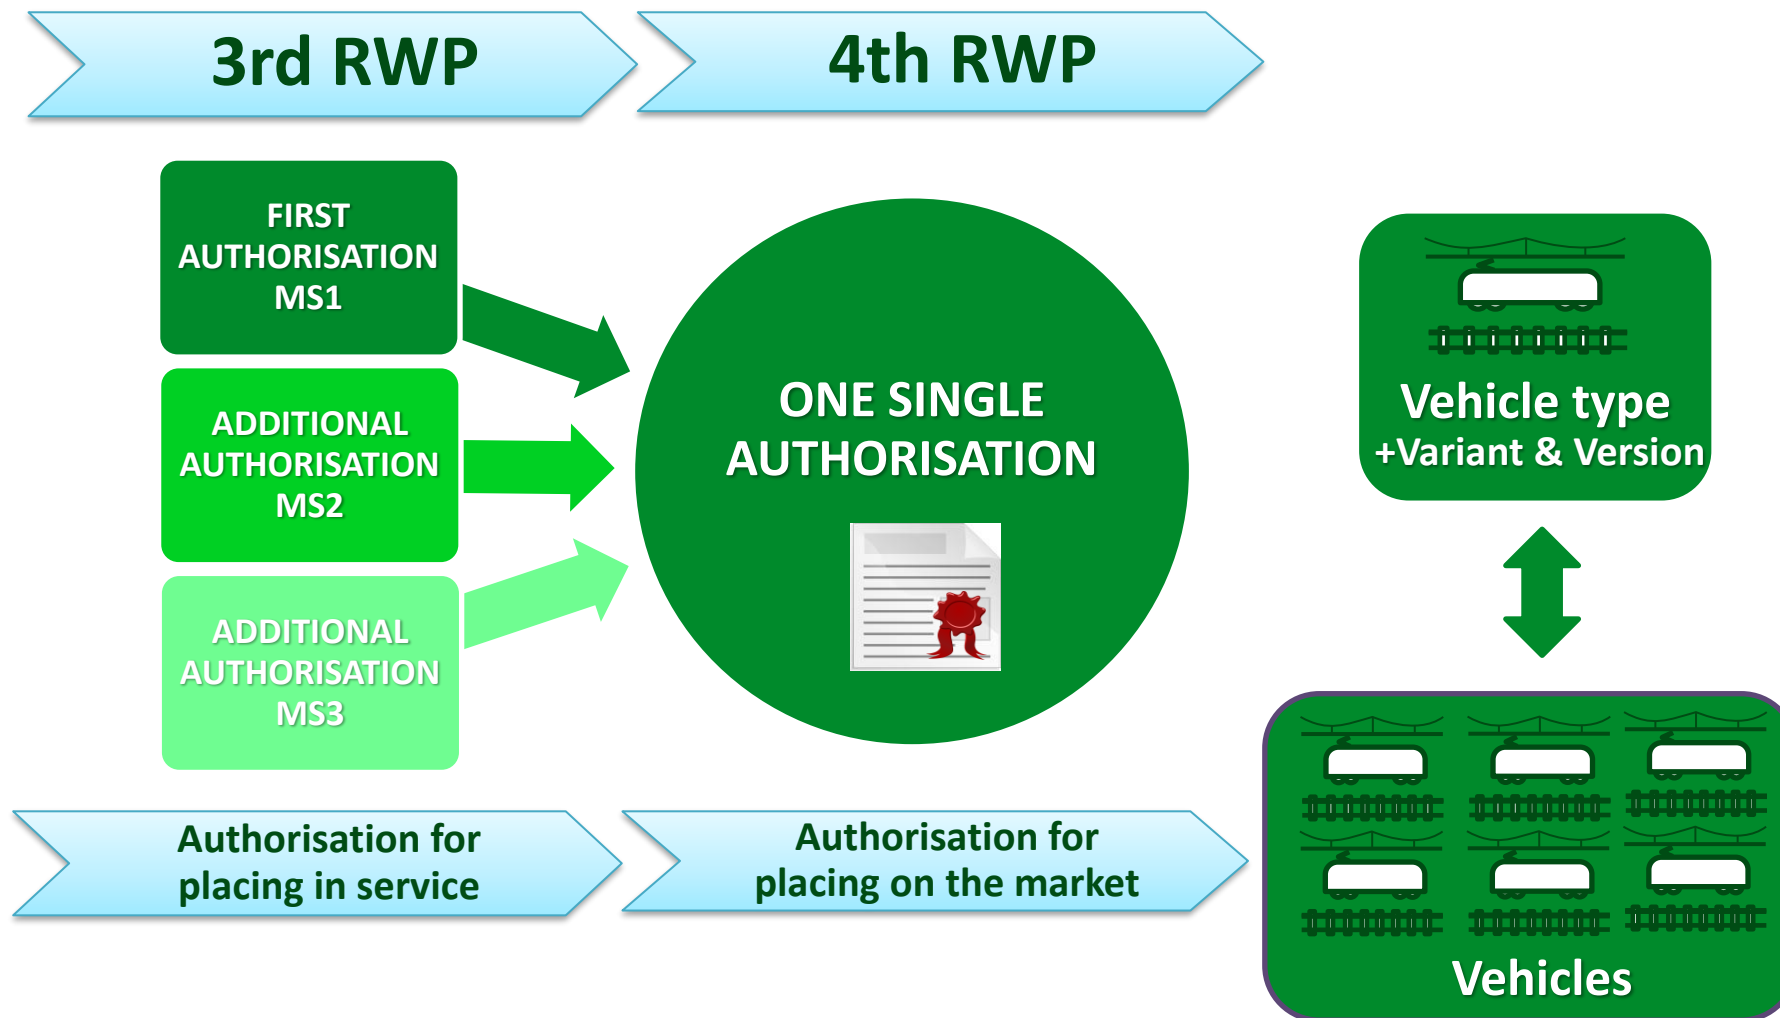

Prague

08/09/2021

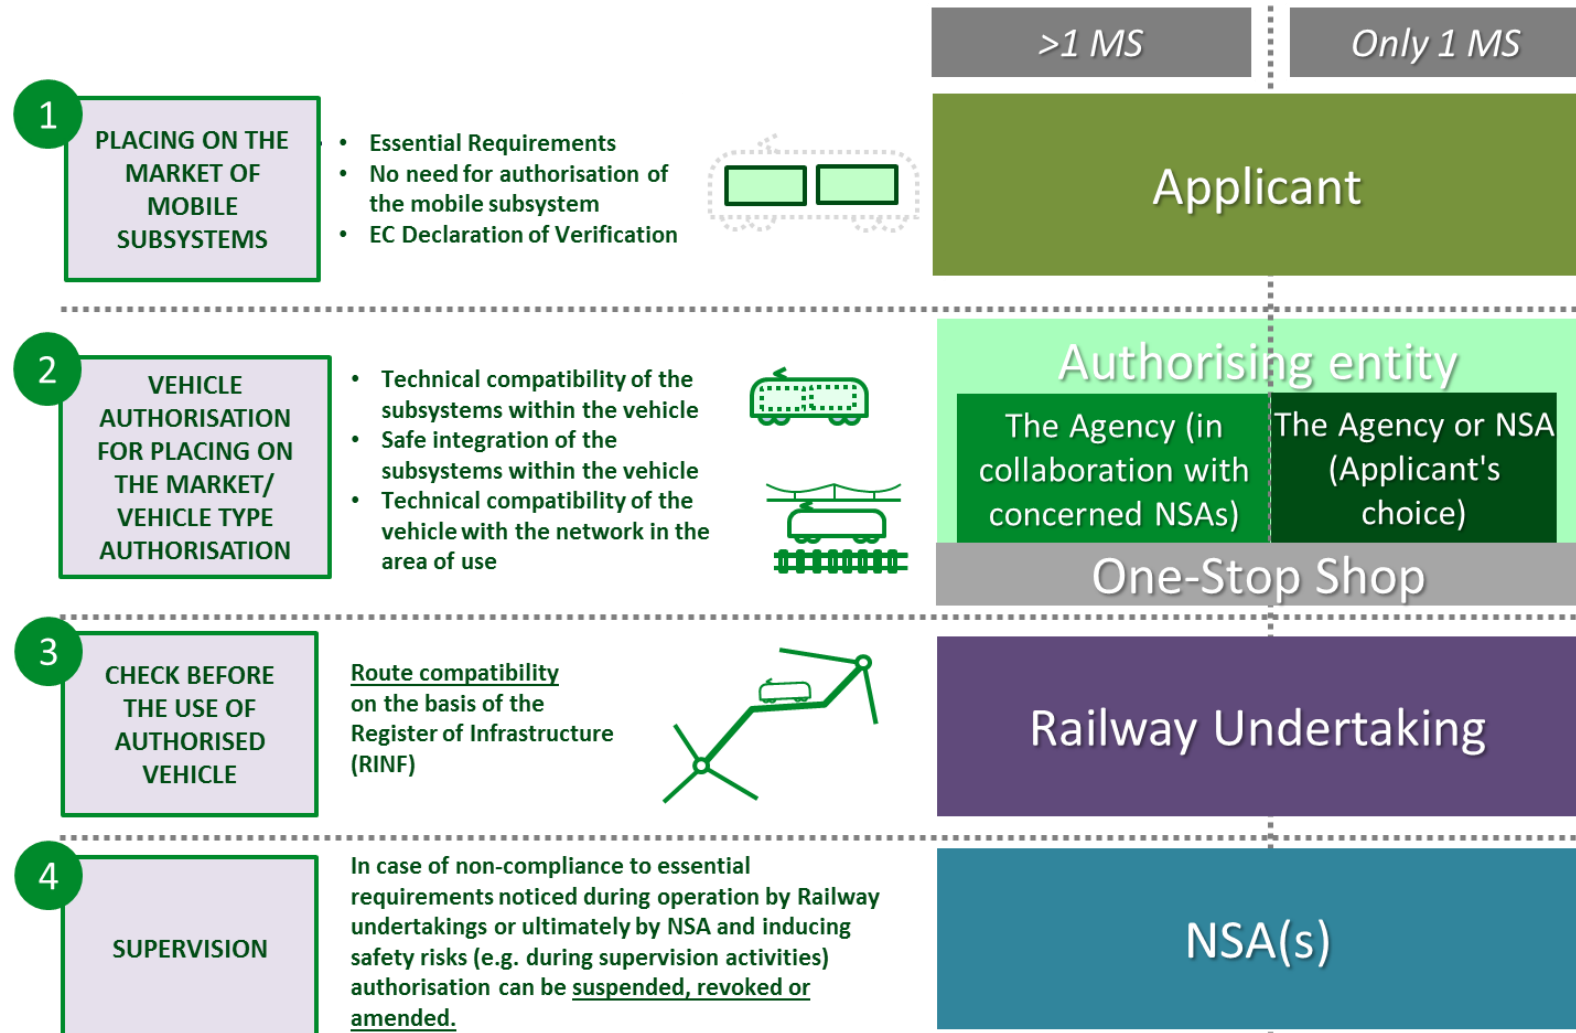

- Current status of the VA process (June 2021):
 - 1737 VA issued
 - 20507 vehicles covered by the VA proces
- Forecast for 2021:
 - 160-180 Vehicle (Type) Authorisation cases
 - +1000 Conformity To Type cases

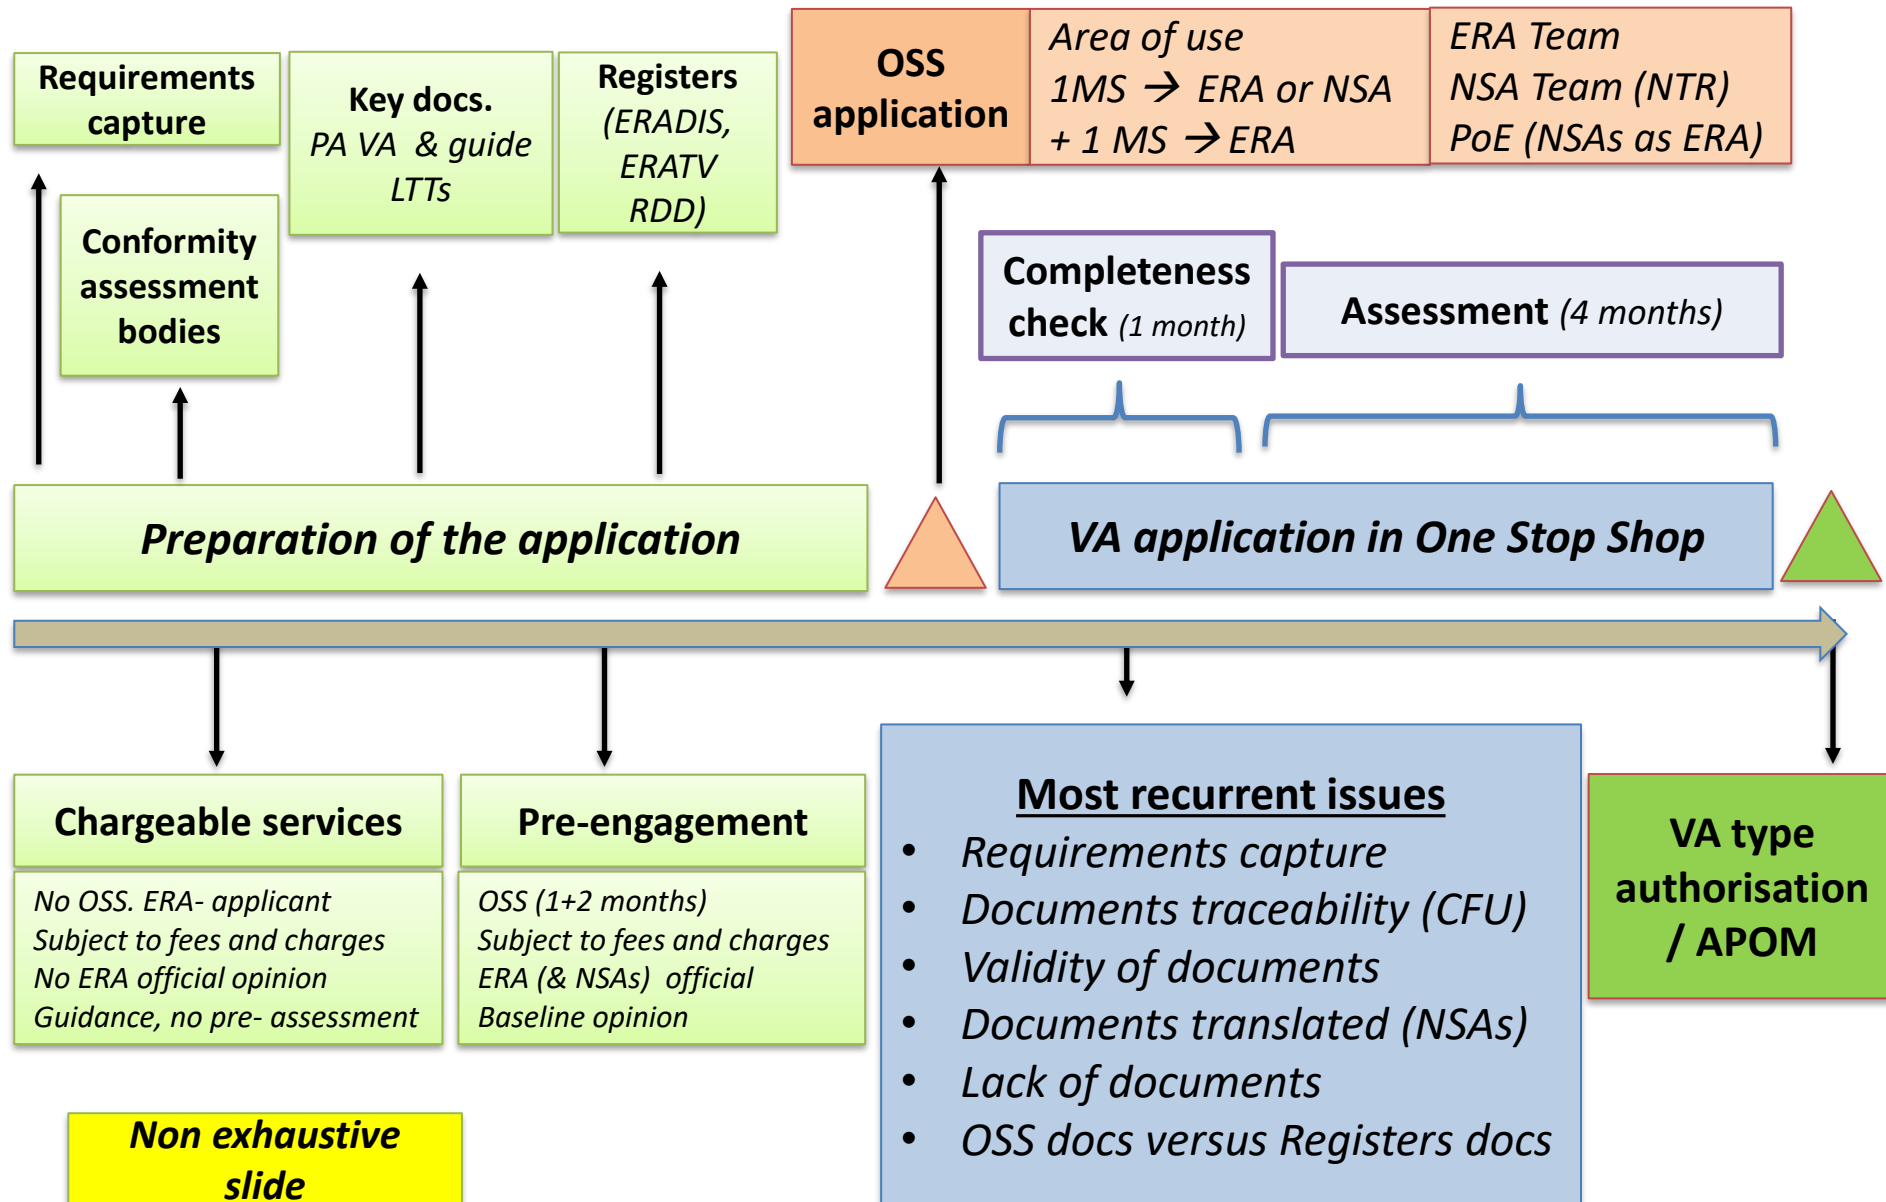

- The technical pillar of the 4th Railway Package

■ The technical pillar of the 4th Railway Package

Some high level information on the VA procedure

- A Line to Take is a clarification issued by ERA concerning the position adopted by the Agency with regards to the interpretation of the 4RP framework. The content is most likely to be incorporated to the review of VA Application guide
- The LTTs are available at the ERA website in the section dedicated to Vehicle Authorisation (see Related guidance):
https://www.era.europa.eu/applicants/applications-vehicle-type-authorisations_en

- Refer to the support materials available: **VA guidelines and clarification notes (LTT)**
- Do a **review** yourself of the files before submitting through the OSS
- Ensure that **ERADIS** is properly populated to avoid delays in last stages
- Take care of providing files in the **chosen language**
- Consider **pre-engagement** as it is a great way to reduce risks for projects
- **Requirements capture** is a support for applicants, and needs to start as soon as the project starts
- **Good quality** of the application file leads to reduced processing time and less issues
- Use the **learning opportunity**: often the first application under the 4th RP framework requires a lot of additional work that should be avoided with next applications, when the process is better known and understood

- Legal framework requires that:
 - Applicants for the placing on the market of the mobile subsystems upload the ‘EC’ declarations of verification of subsystems
 - Manufacturers (or their authorised representatives) of ICs upload the ‘EC’ declarations of conformity of interoperability constituents and the ‘EC’ declarations of suitability of use of interoperability constituents
 - Notified Bodies upload ‘EC’ certificates of verification of subsystems, ‘EC’ certificates of conformity of interoperability constituents and ‘EC’ certificates of suitability of use of interoperability constituents
 - The Agency makes publicly available the documentation uploaded by applicants, manufacturers (or authorised representatives) and notified bodies through ERADIS.
 - The applicant has the duty to submit the documentation in ERADIS before submitting in OSS application
 - **The authorising entity (Reg. (EU) 2018/545) shall check that ERADIS is duly populated before to issue vehicle authorisation**

- As a consequence, since June 2019 many Notified Bodies and applicants asked the immediate publication in ERADIS of the relevant documents which were not yet uploaded in due time in the past, resulting in a substantial backlog in these publications
- In order to provide the latest information on the status of documents in ERADIS, the Agency has enabled (in the framework of national vehicle authorisations), the following functional mailbox:

ERADIS@era.europa.eu

- Following an NSA request for information, the NSAs will receive promptly the relevant information enabling them to process the national authorisation files without further delay
- This information has been sent to all NSAs via letter on 22/10/2019

- The Agency has detected some discrepancies when filling information in ERATV, namely:
 - Missing authorised vehicle types in ERA TV
 - Coded /non coded Restrictions information
 - EIN format
 - Make sure the list of TSI is complete in Section 2 (missing references to TSIs)
 - Lack of consistency in encoding 7.1.2 WAG TSI parameter (Type meets the requirements necessary for validity of the vehicle authorisation granted by one Member State in other MSs)
Besides new ERATV parameters do not contain parameter 4.1.8

Questions?

For any further information, questions, comments, please use the contact form on the ERA website:
https://www.era.europa.eu/can-we-help-you/contact-us-0_en

Malá prosba: Evropský průzkum klimatu bezpečnosti železnic

- Agentura provádí **Evropský průzkum klimatu bezpečnosti železnic**, aby lépe pochopila bezpečnostní klima evropského železničního odvětví a podpořila rozvoj kultury bezpečnosti železnic v Evropě.
- Průzkum je zaměřen na **všechny zaměstnance všech typů železničních organizací**
- Odpověď trvá **10 minut** a lze ji vyplnit na **jakémkoli zařízení** (počítač, mobilní telefon, tablet).
- Je k dispozici ve všech **22 jazycích EU** - prostřednictvím odkazu nebo QR kódu.

Zveme vás k účasti na průzkumu

- Vyplňte dotazník
- Sdílejte průzkum ve své organizaci
